

Ultrasonic thickness gauge GM100

- * measurement range: 1.2~220 mm (steel)
- * accuracy: + (1%H+0.1) mm
- * resolution: 0.1mm
- * velocity range: 1000~9999m/s
- * working frequency: 5MHz
- * pipe measurement lower limit: Φ 20*3mm (steel)
- * automatic proofreading zero, on the system error correction
- * linear automatic compensation, in the whole range of the probe using nonlinear error correction of computer software, in order to improve the accuracy of
- * the data storage / data query / data delete function
- * velocity measurement: according to directly measure the velocity of sample block thickness
- * low power indication function
- * automatic shutdown function
- *LCD backlight function
- * the warranty period: 12 months
- * packing: color box +PP tool box
- * Power: 3 1.5V AAA battery
- * product net weight: 210 grams.
- * the product size: 70*145*28 mm
